A colorful futuristic town with a train station and giant clock tower - a Funny, adventurous, mysterious, exciting, and heartwarming moment.

Maya moves through the scene, following the story idea: A curious teenage inventor named Maya is testing a homemade robot in her small futuristic town when she discovers a mysterious glowing robot hiding inside an abandoned train station. The robot can only remember one message: "Find the clock before sunset."

Maya decides to help. She follows a trail of strange clues through the town. First, a runaway delivery drone accidentally leads her to an old electronics shop. There she discovers a hidden map containing a symbol that matches the robot's glowing core.

The map points toward an underground tunnel beneath the town. Maya and the robot enter the tunnel and discover an enormous forgotten machine connected to the town's old clock tower. Suddenly, the machine activates and the clock tower begins counting down toward sunset.

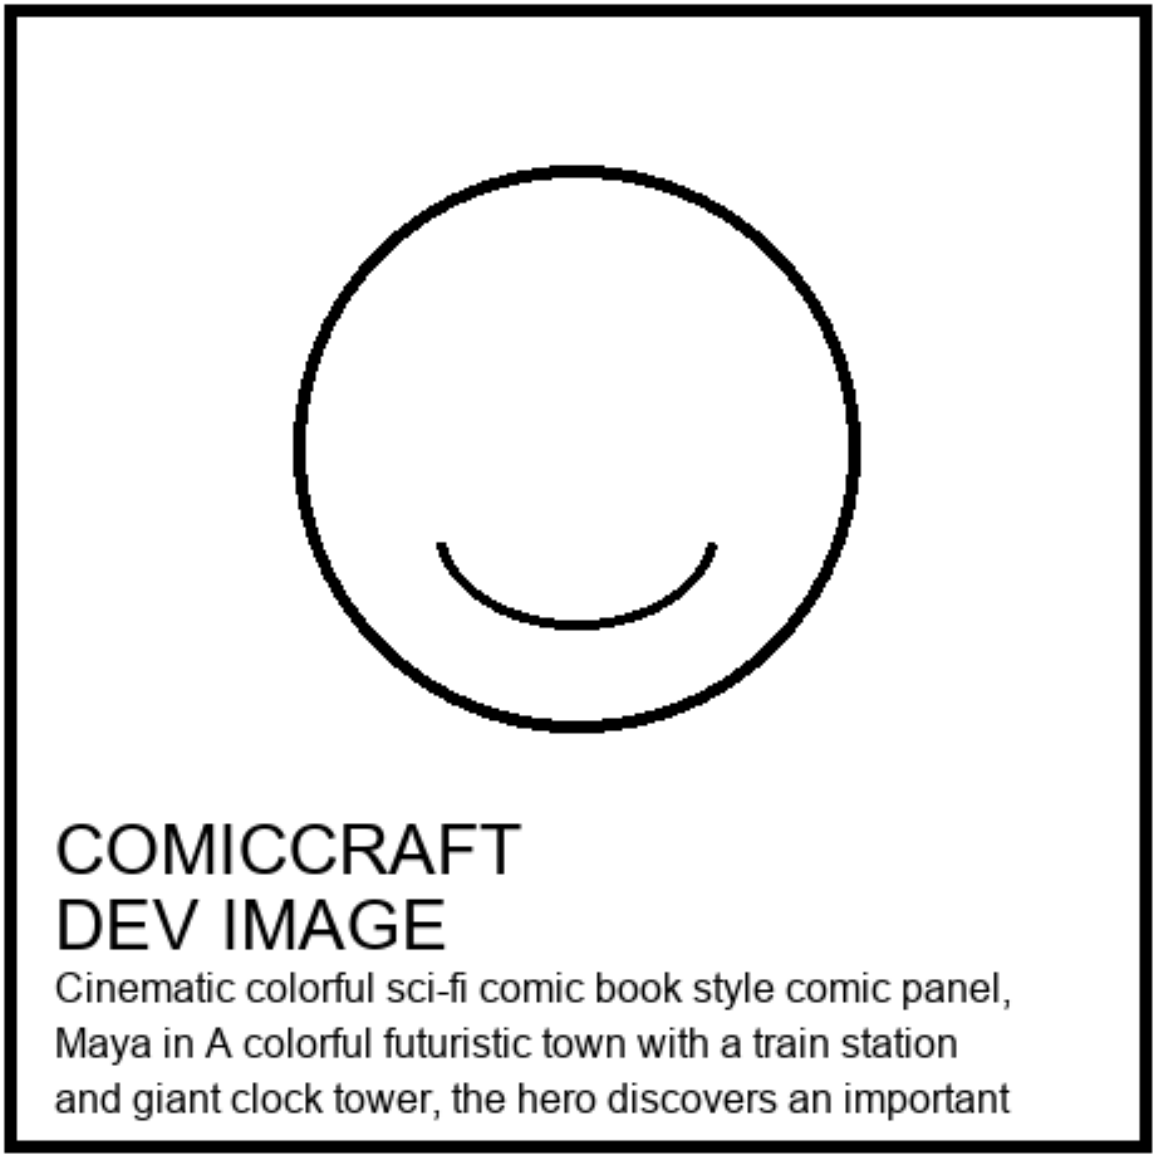

Maya realizes the glowing robot was sent to activate the machine, but nobody knows why. Instead of destroying it, Maya studies the machine and discovers a recording from her future self. Her future self explains that the machine is actually an emergency system designed to protect the town from a massive power failure.

With only minutes left, Maya repairs the machine using parts from her homemade inventions. The system activates just before sunset and restores power to the entire town.

In the final scene, Maya discovers one last surprise: the glowing robot was built by her future self specifically to find her. Maya laughs and says that apparently her future self has terrible timing but excellent engineering skills.

Make the comic funny, adventurous, mysterious, exciting, family-friendly, and visually cinematic. Build suspense across the five panels and give the final panel a surprising but heartwarming payoff.. The moment builds toward the next panel.
Maya: We can do this!
